DETAILED ACTION

Withdrawn From Issue

A Notice of Withdrawal From Issue, under 37 CFR 1.313(b), was mailed to Applicant on December 2, 2002.

Allowability Withdrawn

The indicated allowability of claims 8-21 is withdrawn. Prosecution is re-opened on the basis of the following, newly asserted rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8-21 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Independent claims 8 and 18 each recite "etching portions of said pole P1 using a P1 pole etchant ion beam... in part with a second P1 pole etchant ion beam angle away from normal of from 65° to 85°." This subject matter was not described in the specification as originally filed. The specification describes a 65-85 degree angle used during etching of a write gap not a pole. Pole etching is conducted at an angle of 65-80 degrees (see page 8, line 15). By virtue of their dependency upon claim 8 and 18, claims 9-17 and 19-21 are directed to the above noted subject matter for which the specification lacks a sufficient written description.
